Summary

As a dedicated and ambitious student pursuing Computer Application Development with a strong passion for web development, I bring a blend of technical proficiency and a hunger for learning to excel in a dynamic web development role. With hands-on experience in Full Stack React.js, I've successfully almost completed Amazon Clone with React.js, i18next, stripe, and firebase.

Experience

Express.js Project

Conestoga College

Jun 2023 - Jul 2023 (2 months)

- It was a simple Express.js web app where the user can modify the header
- It has the login and create an account page
- All data stored locally in the MongoDB
- User can add navigation links, update and delete from header
- I learnt about the routing with the help of express.js
- Get Method, Post Method, EJS

Web Developer

Personal Portfolio

Aug 2023 - Present (2 months)

- It is a clone web app of the E-commerce site "Amazon" using React.js
- I have added the multiple language functionality with the help of i18next
- Handled the authentication using Cloud Firebase
- Added Payment feature to it with stripe payment services
- You can create a new account, login
- You can add the product to the cart, remove it from the cart and Buy the product which is inside the cart.
- Currently, I have added two languages to it. (e.g. English default and Arabic)
- All the data will stored on the Firebase with user info and it's products
